## **2 FOR 1 BONUS:**

**Your Membership includes access to both:**

**Trade Alerts by Text Message and e-mail  
AND  
The Market Investing Strategies Newsletter  
Full Members Only Edition**

Our Where To Invest Now For Profits In Up or Down Markets Newsletter is more compact, informative, effective and quicker to read then the major, big name publications. AND there are NO ADS to wade through.

The Members Edition Newsletter is sent to you by e-mail Monday Mornings and available in the Members Area along with our archive of past issues.

This Princeton Research, Inc. publication features:

➤ **Investment Alerts Trade Analysis and Discussion**

Head Trader, Charles Moskowitz, reviews trades made, what he is watching now, analysis of where he sees things going and where to investing now in the coming week.

➤ **Investing Trade Alerts Trade Table, Positions and Performance Summaries**

See where we are invested and our performance for the week. This includes trading tables and positions showing profits and losses for the week.

### ➤ **Market Laboratory – Weekly Changes**

The Market Laboratory table provides a fast overview guide, giving our readers a great analysis of market sentiment and the general prevailing attitude of investors. This continues to be a strong, solid indicator of where to invest now.

### ➤ **Market Strategies Technical Information**

This great where to invest now market analysis tool allows you to quickly see, at a glance, support and resistance levels for the major indexes;

Dow, S&P 500, QQQ, Transports and NASDAQ

### ➤ **Our Stock and Options Trading Accounts Trade Tables, Positions and Performance Summaries**

See where we are invested and our performance for the week. This includes trading tables and positions showing profits and losses for the week.

We cover both a \$10,000 trading portfolio and a \$100,000 trading portfolio. These benchmark levels provide a guideline, enabling our members to scale their investment level amounts up or down depending on the capital they have and are comfortable investing.

### ➤ **Undervalued Small Cap Stocks**

See coverage of the undervalued, small cap, lower priced stocks we follow. These companies have innovative, life enhancing technologies. They possess the potential to produce significant price upward swings, giving investors big profit returns.

### ➤ **Fundamental Analysis Stocks To Buy with Stops**

We use fundamental analysis we select top stocks to buy now. Buying these stocks while using stops to protect capital, continues to produce solid, strong profits for us.

### ➤ **This Weeks' Economic Numbers, Earnings Releases and Media Data**

See this week's coming earnings report and economics information. This information provides a tremendous advantage in pin pointing stocks that can perform or drop due to earnings reports.

The economic data keeps us up to date on the most important daily where to invest now information coming out.

➤ **Market Strategies Fundamentals**

Fundamental analysis of industries, top stocks, the economy and the markets together with US and World events provides great insight into where the next investment winners will be.

➤ **Market Strategies Economic Data**

Our in-depth analysis of current economic data projects where the economy and the market is going showing us which sectors and companies in them are the strongest investments now.

➤ **Market Cycles**

Our in-depth analysis of market cycles, which are known among top traders as “The Key To Maximum Returns”.

➤ **Trader’s Almanac**

This daily Calendar of Market and Economic Events quickly shows, at a glance, important economic, market and trading events for the month.

**\$10,000 Trading Portfolio**  
**Charles Moskowitz Discussion**

1 Open Position:

Long 6 K February 75 Calls

Funds in Use = \$ 450

Week 4 was a nice gain for us with MOS breaking out and profits taken before a pullback the next day. A small gain in HOG added to make the total for the week \$644 and brought YTD gains up to \$1,547. We only have one open position in K 2/75 calls at a cost of \$ .75 for a total funds in use of \$450.

The Sunday morning shows were consumed by the new airport stops at airports around the country. According to both of the shows I watched they both used the same numbers, with 325,000 arrivals the total number of people detained for further vetting was 109. While the lines may have been inconvenient for those coming in (Americans included) let’s just remember that while everyone complained when we started with the enhanced TSA inspections, they serve to make us safer. When I listen to Tim Kaine tell me that this also affects green card holders and those with valid student visas

I would remind him that the Boston Marathon bombing was carried out by two brothers who had student visas and had lived here for years before the older went out and came back into the US. The number of fatalities and life-changing injuries from just these two was way out of proportion to just two radicalized terrorists. These are not good odds. And while Mr. Kaine complained, he offered no alternative, as usual. At some point all of the partisan BS has to stop.

Back to the charts; I looked at over 800 this weekend and there are plenty that look okay and many that don't. The best I can say about the XRT is that it's oversold. In that area some of the value destruction in individual names is startling. M -30%, ANF -50%, FOXL -30% (private label maker of watched for many), KSS -30%, LB -20% and closed All of its mall stores. Again, the best that can be said of this group is that it's oversold. Mall business is bad. I'm in N.Y. this weekend and have gone to several indoor malls and the big Roosevelt Field mall and there is just no traffic. AMZN and the individual company websites are growing bigger and stronger daily while the brick and mortar wanes.

There are also many charts that have been incredibly strong that made new highs followed by closing lower. Last, but not least, Gold had a rough week after running into resistance around 1220 backed off \$40. I'll wait until I get a better idea on whether it holds this important 1180 area before reestablishing a long position or rallies to 1200 and fails to get short. The oil seem stuck in the \$55-51.50 range and is a non-trade to me unless I can sell the highs or buy the lows and use stops to limit risk....CAM

### **Market Strategies \$10,000 Trading Account Trade Table**

All trades were based on your participation in the texting service to receive updates.

<b>DATE</b>	<b>TRADES</b>	<b>PRICE</b>	<b>COST</b>	<b>PROCEEDS</b>	<b>RESULTS</b>
01/27	Sold 4 HOG February \$ 60 Calls	1.62		648	<b>92 Gain</b>
01/25	Sold 3 MOS February \$ 32 Calls	1.92		576	<b>300 Gain</b>
01/24	Sold 3 MOS February \$ 32 Calls	1.76		528	<b>252 Gain</b>
01/23	Bought 6 K February \$75 Calls	0.75	450		
01/19	Bought 4 HOG February \$ 60 Calls	1.39	556		
01/09	Bought 6 MOS February \$ 32 Calls	0.92	552

## Undervalued Small Cap Stocks

Lower Priced stocks that look to be a buy:

### Repro-Med Systems, Inc ( OTCQX: REPR 0.42 )\*

Repro Med Systems, Inc. dba RMS Medical Products (OTCQX: REPR) announced its financial results for the third quarter of the fiscal year ending February 28, 2017. For the quarter ended November 30, 2016, net revenues were \$3,193,113, an increase of 1.5% compared with \$3,144,954 in the same quarter last year. This also represents an increase of 1.4% versus the last quarter. For the nine months ended November 30, 2016, net revenues were \$9,331,208, an increase of 4.4% compared with \$8,941,676 for the same period last year, driven by increased sales of our infusion products to existing customers as well as the addition of new customers. Excluding non-recurring clinical trial work in 2015, core revenue is up 6.5% for the most recent nine months.

There is a new application for our High Flo Subcutaneous needle sets for treatment of Parkinson's disease, which is an entirely new market for us. We have new trials going on all over Europe, and the possibility of one in Russia, in partnership with several pharmaceutical companies. We'll soon have trials in Germany, Sweden, and probably Italy. We are preparing a new market launch of an addition to our system designed for Facilitated Subcutaneous Immune Globulin (FSCIg) which was subject of a Swedish trial, and was such a hit (human factors study showed 95% out of 100 satisfaction), that patients are lining up and building pressure for us to begin delivery which we are working hard to accomplish. This new system is also under trial in Germany. For the first time patients are able to perform the delivery at home without nursing support. We are working with large Pharma companies to deliver their new drugs to our markets widening the market for our High Flo 24 gauge needles.

The Europe team is comprised of impressive individuals. They each bring unique talents and collectively Andy believes they are unstoppable. Chatarina S., Global VP of Marketing located in Sweden, will assist the sales team for the Scandinavian region while still performing marketing and clinical support. Markus D. our super salesperson in Germany is working hard to get our new distributor there up and running. Manal H., based in the USA, is the glue that binds this team together. She is always in the lead initiating new dynamics for the team and the Company. Dr. Sabino Loiodice, who is our new Director of European Sales and Marketing, has great experience along with the ideal European charm, maturity, and a very modern approach to management which embraces coaching, mentoring, and preempting obstacles. Expect great things from this super team.

### Enzo Biochem ( ENZ: \$ 6.68 )\*

Enzo Biochem closed the calendar year 2016 at \$6.94 a share. For the year it was up 54.22% versus the Dow Jones +13%. The relative strength index was 53.41 which is neutral and short interest declined to 827,800 shares. Enzo's balance sheet closed their first quarter October 31 with \$67 million in cash and current equivalents and complete elimination of debt. Both the Clinical Lab and Life Science divisions ended the year profitably. New products were added to their catalog and litigations have moved ahead leaving them as a plaintiff with 6 lawsuits in the Delaware Court and one in the Manhattan Court.

What do I look for in 2017? The market will be interesting in the first half with the Government transition to a new administration. I think the Institutional Investor will be a bit more risk adverse until the direction of the economy becomes clearer. As far as Enzo the Company is concerned they will be having their Annual Shareholders Meeting on Thursday January 5 at 9 AM at the Yale Club in New York. It will be interesting to see how Management see's the Health Care Industry being affected by a change in the Affordable Care Act.

The following week Management will be at the J P Morgan Health Care Conference in San Francisco January 9-12. I would hope to see an increase in top line revenues reflecting National rollouts of the new AmpProbe products as well as others and more approvals of products in the pipeline. I also anticipate that we will hear the trial results from the NIH on the use of Optiquel for the treatment of Uveitis. March and April will see Summary Judgements acted on by the Court in the Delaware cases. Trial dates have already been set for Genprobe and Holgics for October, Roche in November and Becton Dickenson in December. Abbots Summary Judgement request was denied by the Court but the trial date has yet to be set. At some point the 2nd Court of Appeals will rule on Enzo's appeal on the CT.

Courts reversal of the Jury's decision in the Enzo vs. Apalera Case. The market is giving no value, win or lose, to this decision. The stake is \$65 million with no adverse effect if ruled against Enzo. Enzo should again outperform the Dow and S&P in 2017.

#### Updates on Delaware Litigations

The last earnings report showed a cash position in excess of \$65 million with no debt to speak of and a positive cash flow from their operating divisions. The only cash burn is coming from Litigation expenses and a bit from Research and Development. Litigation in Delaware is on a contingency basis as such Enzo is not on the hook for billable hours. To my knowledge there are 6 suits left after 6 have settled.

When the company gets a 500 million dollar market cap (\$10.63) they will qualify for those Institutions that can't buy microcap stocks. A significant number of Institutions will look to be buyers and with only 47 million shares issued and Institutions already owning 50% and insiders owning 15% that leaves less than 17 million shares in the float.

### **Pressure BioSciences OTCQB: PBIO ( 0.16 )\***

has identified significant “needs” and the means to fill them in the world of today and the foreseeable future:

**NEEDS IN MEDICINE:** In the world of medicine our dramatically improved ability for early detection or to confirm and refine diagnosis ranging from over a hundred types of cancer to tuberculosis and a hundred other maladies and conditions is “bottlenecked” by 30 year old methods of preparing test samples. Collectively such diagnostic samples exceed a hundred million annually.

**NEEDS IN RESEARCH:** Globally there are over a half a million medical and pharmaceutical research scientists working in over eighty thousand laboratories who are hampered by the time consuming and outdated methods of preparing test samples.

NEEDS IN FORENSICS: Globally, in millions of cases, swift and sure exoneration of the innocent and / or justice for the guilty is often delayed or even denied because of the ponderous means of preparing and conducting DNA and other forensic testing.

PBIO is focused on solving the challenges of biological sample preparation, a crucial laboratory step performed globally by the biological life sciences research scientists. Sample preparation refers to a wide range of activities that precede most forms of scientific analysis. It is often complex, time-consuming and, in our opinion, one of the most error-prone steps of scientific research. Sample preparation is a ubiquitous laboratory undertaking – the requirements of which drive a large and growing worldwide market.

PBIO has developed and patented a novel, enabling technology platform that can control the sample preparation process while improving both efficacy and quality. It is based on harnessing the unique properties of high hydrostatic pressure.

This process, called pressure cycling technology, or PCT, uses alternating cycles of hydrostatic pressure between ambient (normal atmosphere) and ultra-high levels i.e., 35,000 pounds per square inch (“*ps*”) or greater to safely, conveniently and reproducibly control the actions of molecules in biological samples, such as cells and tissues from human, animal, plant and microbial sources.

The PBIO pressure cycling technology uses proprietary and internally developed instrumentation that is capable of cycling pressure between ambient and ultra-high levels at controlled temperatures and specific time intervals, to rapidly and repeatedly control the interactions of bio-molecules, such as deoxyribonucleic acid (“*DNA*”), ribonucleic acid (“*RNA*”), proteins, lipids and small molecules.

**Their laboratory instrument, the Barocycler<sup>®</sup>, and their internally developed consumables product line, which include Pressure Used to Lyse Samples for Extraction (“*PULSE*”) tubes, and other processing tubes, and application specific kits such as consumable products and reagents, together make up their PCT Sample Preparation System (“*PCT SPS*”).**

The PBIO pressure cycling technology takes a unique approach that has the potential for broad use in a number of established and emerging life sciences areas, which include:

- *Biological sample preparation in potentially thousands of research laboratories worldwide working in human, animal, plant, and microbial diseases and disorders – including but not limited to sample extraction, homogenization, and digestion in genomic, proteomic, lipidomic, metabolomic and small molecule study areas;*
- *Pathogen inactivation (useful in vaccine development, infectious disease research, and more);*
- *Protein purification, and in the control of chemical reactions, particularly enzymatic (useful in drug design and development);*
- *And immunodiagnostics (useful in the development and detection of biomarkers).*

## INTELLECTUAL PROPERTY

PBIO has secured their technology through fourteen issued United States patents and ten issued foreign patents covering multiple applications of pressure cycling technology in the life sciences field.

They also have additional patents pending. Research indicates that Pressure BioSciences Inc is the ONLY Company globally to have patents in this new science sector.

### **Night Food, Inc. ( NGTF 0.18 )\***

is a wholly-owned subsidiary of Night food Holdings incorporated in Nevada in 2013 to manufacture and distribute healthy-choice bedtime snacks. The Company has an exclusive agreement with RFI, natural ingredient manufacturer and proprietor of *Chocamine*, a patented chocolate ingredient.

Americans keep gaining more weight. People have the tendency to grab for goodies at the end of the evening as they relax to enjoy some T.V. Eating and snacking too late at night is a contributing factor to gaining weight. Seventy percent of adults, ages 18-54, eat right before bed. Chocamine delivers the health benefits of chocolate to the body (amino acids, minerals and polyphenols) without the added sugars, caffeine or fat.

People give in to the intense hunger cravings that leads to the consumption of sugary, salty or calorie dense foods to satisfy their appetite. Most of the snacks that people typically eat create a disturbance in sleep, causing a person to wake up feeling unrested. Night Food offers nutrient filled alternatives to high-calorie junk foods. There are flavor filled snack bars-either *Cookies and Dreams* or *Midnight Chocolate Crunch* that will help curb hunger, satisfy cravings, improve rest and give the body essential vitamins and minerals.

Consumers spend over \$50 billion/ year on night-time snacks, nearly 1 billion a week. More people desire healthy alternatives to late night consumption of the traditional fattening ice cream, chips and cookies.

Sugar and caffeine in most snacks causes disruptive sleep. Each bar has only 142 calories and 5 grams of fiber for slow absorption of energy and gives a feeling of fullness and satisfaction. There is also 132 mg of calcium and zinc for replenishing the body and feeling well rested in the morning.

### **Leo Motors ( LEOM: \$ 0.10 )\***

has patents for the electric battery industry which we will be writing about in upcoming weekly reports. They have developed a lithium battery that can operate vehicles in sub-zero climates. Their subsidiary LGM has developed battery technology supported by the Korean government to make it possible to use electric battery technology for fishing boats. They have a cartridge system which is a light-weight replacement method of swapping electric batteries.

Fishing has been harmed by the noise and oil leaks from internal combustion engines. LGM has solved that problem and besides eliminating the toxic problem, operating costs are reduced by 25%.

In addition they have a special patent for averting electric hazards and shocks. Leo developed the Internet of Things for e-boats which is networked and connected with an Android Operating System. Leo's power supply system is CAN ( Controller Area Network ) based, which enables mobile diagnosing between mobile devices and boats using the Leo technology.

Leo is developing a battery swap system for Kalmado in Puerto Princesa, Philippines, a world famous tourist attraction, which is focused on green energy. They will be converting 100 boats as the environment is expected to become 100% free of the toxicity from internal combustion engines. Also, Leo has developed a battery swap system for Go-Karts to be used in malls in China, Korea and Myanmar. Leo Motors has a new carbon nanotube battery power pack that functions and supplies full power in extreme low temperatures such as below 49 degrees without the need for grid electricity.

### **Galaxy Gaming ( GLXZ: \$ 0.60 )**

is on a nice growth pattern: They are in a great business with very little aggressive competition. They have some of the best development and manufacturing of table games and related products for the casino industry worldwide. Casino operators are in search for new and challenging table games to obtain increased interest and more funds from players.

Located in over 500 casinos around the globe, the Company offers a large portfolio of the world's most popular side bets and proprietary table games. Additionally, the Company has a line of systems and associated equipment which provide casino operators with enhanced profitability, automation and security of table game operations.

## **Fundamental Analysis Stocks To Buy with Stops**

Using fundamentals the following are stocks to trade hypothetically. They have done well. We have taken numerous profits as indicated on the table below. Balance is critical.

We remain long Alcoa AA, which is moving nicely.

Some of our stocks closed lower last week including Flushing Financial. FFIC.

Bank stocks are into a reaction phase after having continued bullish into the new year.

You must use your own discretion on whether to take profits.

The Boeing is still likely to trade above the \$ 170 level in the new -year.

We bought Bristol Myers at \$49.20 back on October 17<sup>th</sup>, sold on stop at 55.45 December 7<sup>th</sup>;

We are long FFIC at \$ 19.10 and very much interested in holding long the Flushing Financial.

We are looking to re-buy Hecla HL which was stopped out at \$ 5.64 on Dec 15<sup>th</sup>.

The HDGE is not relevant at this time.

We are looking to buy the GSCI, symbol GSG, a commodity indexed fund managed by Goldman.

Symbol	Name	Business Description	PE	P/S	MV mln	Price	Buy or Sell Limit	Stop Loss Or offset

## Rule 17B Attestations and Disclaimers

Princeton Research, Inc. has approximately 2,581,578 shares of AIVN both free and restricted and represents them for Investor relations. Princeton also has about 40,000 shares of TXGE. Princeton is paid \$ 1,500 per month from RMS Medical Products. Princeton has bought 81,100 shares of RMS Medical Products. Princeton was paid \$ 2,500 to write a report on Xinery. Princeton has signed a contract with CBLI to be paid \$ 2500 for July and August for investor relations. Princeton has been engaged by Target Energy. No contract is currently in place. Princeton was paid about 500,000 restricted shares of Leo Motors.

When there is no movement in penny stocks, even though there is none or very small losses, we will liquidate ( sold AIVN on stop ) even though we like the company, if money is needed for better opportunities.

We now believe REPR represents upside opportunity. The Target ADR trades at about \$ 4.50 in U.S. vs 0.05 in Australia. Princeton owns 400,000 Australia shares and about 900 U.S. ADR's.

Pursuant to the provisions of Rule 206 (4) of the Investment Advisers Act of 1940, readers should recognize that not all recommendations made in the future will be profitable or will equal the performance of any recommendations referred to in this e-mail issue. Princeton may buy or sell its free-trading shares in companies it represents at any time.
