American Resources has 2nd Business Plan Underway

American Resource Technologies, Inc. (ARUR.OB) is a Kansas Corporation which specializes in the utilization of modern technologies with known resources to enhance project output. The original focus of the Company was domestic oil and gas properties in S.E. *Kansas*, but also has international partners. The company currently owns Working Interest or Mineral Lease positions on (4) four leases, consisting of approximately 1,800 acres in the heart of one of the most prolific areas in the USA for methane gas production. The Company has completed a (3) three year, (15) fifteen well drilling program on these leases. The company is currently initiating it's 2nd (3) three year business plan which includes a thirty (30) well drilling project, a forty-six (46) well reworking project and an increase in mineral acreage of approximately 20,000 acres in the region.

The leases on which the Company currently has working interests are; the *Ownbey, Troyer, Linn, Lindley and O'Brien*. Each lease has wells capable of commercial oil/gas production and is in close proximity to a natural gas gathering system with sufficient capacity to transport our natural gas production needs. The total cost for this 3-year business plan is approximately \$30,000,000.00, with a fifteen (15) year revenue projection in excess of \$459,500,000.00.

In addition to domestic oil and gas production and exploration, the Company has obtained a substantial ownership position in 3 *Oklahoma* Corporations. One of these corporations, *Thor GeoTrak, Inc.*, has developed new, patent pending surface gamma ray technology for the detection and 4-D interpretation of sub-surface hydrocarbons and uranium deposits. The other two corporations own controlling interests in 2 Limited Liability Company equivalents in the South American country of *Brazil*. One of these companies specializes in the development of domestic on-shores fossil-based and renewable energy. A second, is a technology based company specializing in wireless electrical power and remote monitoring and internet advancements through fiber-optics with specific focus on the *2014 World Cup* and the *2016 Olympics*. Another affiliate company of *ARUR* works to help establish operations by receiving both drilling authorization and approval by the government.

Company Highlights

- **ARUR.OB**
- **Share Price:** \$.12
- **Market Cap:**
2,957,755.00
- **Shares Outstanding:**
34,422,112
- **Avg. Volume:** 20,000
- **Wells producing:** 2
- Very low debt.

Timeline and Goals of 2nd 3-Year Business Plan

20 Wells: Developing , Exploring and Drilling

Phase 1 (Developing)

- Acquire an additional 20,000 acres previously identified acres in known production area.
- 10 wells drilled/yr x 3 years.

Cost: \$30,000,000

(est) **Production:** 1975 bopd & 8,640,000 mcfpd

(est) **Net Revenue:** \$5,221,350 *(oil) & \$3,916,013 *(gas)
(* Based on \$75/boe & \$3/mcf)

(est) **36-month Capital Revenue:** \$140,976,468

Phase 2 (Drilling)

- Engineer and initiate development of acquired acreage
 - > Selection of 50 new drilling sites.
 - > Begin drilling program of 10 wells x 5 yrs.

Stages 1-3 (12 months each)

- ^ Production
- ^ Data from identified/unproven resources.
 - > Interpret Historical Data.
 - > Interpret Data from Drilling.
 - > Interpret New Subsurface Information.
