Where To Invest Investing Trade Alerts Charles Moskowitz Discussion

Week 21 was another terrific week dominated by trades in the SPY. As mentioned before, with the VIX so low the premium on S&P 500 options are artificially low giving us the ability to trade short term swings quite profitably; and profitable we were. I believe this was the best week of the year with gains of \$1,022 bringing YTD gains from last week's new high to another new high of \$6,022 or 60%.

We have only 2 open positions in HL 6/6 calls and SJM 6/130 calls using \$900.

The S&P 500 and NASDAQ both made new all-time highs while the DJIA was up 1.3% is just 35 below its high close, the DJ Transports are 4% below their highs and the Russell is 3% below its peak. Every time I've pointed this out the laggards have rallied to catch up, so as long as the overall trend is higher, that will remain my expectation.

This week may hold some negative surprises from Washington now that the president is back in town and unable to duck the media. While I try not to lean on this topic too heavily there is no way to argue the fact that there is no faster way to change investor sentiment than political or geopolitical events. If you don't agree you can look at any chart of the major indexes for 5/17 or 3/21 of this year and check the news for that day or the day before, or take a gander at last November when it looks like someone

just flipped a switch to start a new bull trend. Even though the A.A.I.I. sentiment numbers on page 3 show a large increase for the bulls, it is still almost 30% below its long-term average. Until we see this “contrary” indicator higher (well above 45) I see little reason to expect any major selloffs without some “event.”

The metals continue to act well and after a week or so of consolidation both the gold and the silver have again broken a bit higher. If the gold, currently around \$1,268 can break above \$1,273 we could see another \$15-20. Silver can also rally another \$.40-.60 to \$17.90 or so.

Until then, I will continue to watch the financials, since they are due for another move higher with the Fed’s interest rate hike in a couple of weeks and I will keep trading the SPY options as long as volatility keeps the premiums low...*CAM*

Fundamental Analysis Stocks To Buy with Stops

Using fundamentals the following are stocks to trade hypothetically. They have done well. We have taken numerous profits as indicated on the table below. In addition many have been stopped out with small losses. All indicated on the table below, balance is critical.

Alibaba has made a few points. We are raising the stop loss price.

Semiconductors are a leader in NASDAQ. We remain long SIMO.

We have no position in Alcoa AA. If long use the 50 day price m.a. as a risk point.

Flushing Financial FFIC fell to and held the 50 day price moving average on March 3rd, which was a buying opportunity. We would buy the Flushing Financial.

Boeing is on its way to \$ 200.

We are not involved with Bristol Myers.

Hecla Mining is a buy as long as it is above the 13 day price moving average.

We took profits on ENZ but still want to buy at lower prices.

The HDGE is finally relevant at this time. It is a decent long as long as it holds above its 50 day price moving average.

Symbol	Name	Business Description	PE	P/S	MV mln	Price	Buy or Sell Limit	Stop Loss Or offset
BABA	Alibaba	China; more of a retailer than Amazon	50.67	13.21	275.5B	123.99	Bought @ \$ 111 on 4/7/17 opening	121x

REPR* 5000	0.22	10/22/12			

Recommendations will be both listed in this letter and texted to members.

Previous closed out trades can be seen on each preceding weekly market letter.

Market Strategies \$100,000 Trading Account

There were four closed out options positions last week 3 S&P trades and one Jet Blue JBLU trade gaining \$ 2,050.

The best trade was the purchase of 20 May 26th 240.50 Calls at \$ 0.40, and selling over the next two days for a gain of \$ 2,030.

Two additional trades in the S&P 500 netted just \$ 30 for an options profit of \$ 2050.

The options expire on the third Friday of each Month unless otherwise posted.

The Stock table has the following 16 positions: AGQ, AMBA, EYES (2), GSAT, HL, MOS (2), NUGT, REPR, RWM, SAN, SLV, SPXU,TEXQY, TWTR,

:

The options call for a \$ 2,500 investment unless otherwise stated; each stock position requires \$5,000 unless otherwise mentioned specifically.

Money management is based on a hypothetical \$ 100,000.

The 16 stock positions would cost \$ 66,930

The long options positions, the 10 HL June 6 Calls, and the 8 SJM June 130 Calls;

would require \$ 1,800

when combined with the stock requirement of \$ 66,930

equals \$68,730

which leaves excess cash of \$ 31,270.

These figures are approximate and there might be errors.

The trading is hypothetical and we do not count commission costs.

Executions that have occurred at or near the open or close of trading sometimes vary from our actual numbers. For example, when something opens down and it is through our price, we take the next trade whether it is an uptick or continues lower. This sometimes results in a 50% trade that is slightly above or below the exact number.

Lower Capitalized Companies with Great Potential

RMS Medical Systems, Inc. (REPR)

("RMS" or the "Company") is pleased to announce that the umbrella organization of the public health insurance in Germany approved the FREEDOM60[®] Infusion System for reimbursement. The FREEDOM60[®] System was registered January, 31st 2017 and listed in the Medical Device Registry in the category mechanical infusion pumps. It is the ONLY device of its kind registered within Germany.

In partnership with **ContraCare** GmbH, a leader in Germany for Contract Management (reimbursement services) and managed Care, the RMS FREEDOM60[®], FreedomEdge[®], RMS Precision Flow Rate Tubing[™] and RMS HIgH-Flo Subcutaneous Safety Needle Sets[™] are now poised to dominate this growing market in Europe.

The United States Food and Drug Administration ("FDA") renewed the Company's Certificate to Foreign Government ("CFG"). A CFG is issued for legally marketed devices in the U.S. that are in compliance with the requirements of the Federal Food, Drug, and Cosmetic Act ("FFDCA"). A CFG is required by many market regulators in Asia, Europe, the Middle East and Latin America in order to legally sell medical devices in their territories. The renewal of this CFG confirms RMS devices have been cleared for sale in the U.S. and are in compliance with the requirements of the FFDCA. The CFG can be presented to regulators in foreign markets as part of the medical device registration process. Foreign governments often seek official assurance that products exported to their countries can be marketed in the U.S. and meet specific U.S. regulations, for example, current Good Manufacturing Practice ("cGMP") regulations and Quality System Regulations ("QSR").

Torsten Kühn, Chief Executive Officer of ContraCare, commented "as a premium service provider in Germany's health care system, we aim to partner with leading suppliers to provide the best drugs, medical devices and services to our patients while keeping an eye on the cost efficiency of the treatments we provide. The RMS FREEDOM60[®] system with its durable and reliable syringe driver and high-quality HIgH-Flo[™] subcutaneous safety needle sets are exactly the products we needed for immunoglobulin, antibiotic and many other therapies we are providing today. We are glad that the umbrella organization of Germany's public health insurance confirms the unmet need by approving the RMS FREEDOM60[®] System for reimbursement."

Eric Bauer, Chief Operating Officer of RMS commented, "It can take 12 to 14 months to obtain country registration; by partnering with a leading health care provider, that time was cut significantly. Contra Care is an exceptional partner and we could not be more pleased with our relationship. Germany is going to be a great market for our high quality products and our ever expanding product line. RMS continues to be the Global industry leader and create exceptional partnerships around the world to improve patient quality of life."

RMS Medical Products is the leading manufacturer of medical products used for home infusions and suctioning. The Infusion product portfolio currently includes the FREEDOM60[®] and our latest Freedom Edge[®] Syringe Infusion Drivers, RMS Precision Flow Rate Tubing[™] and RMS HIgH-Flo Subcutaneous Safety Needle Sets[™]. These devices are used for infusions administered in professional healthcare settings as well as at home. The Company's RES-Q-VAC[®] line of medical suctioning products is used by emergency medical service providers in addition to a variety of other healthcare providers. The Company's website may be visited at www.rmsmedicalproducts.com.

Contra Care GmbH, based in Nuremberg, Germany, is specialized in providing Contract Management (reimbursement) Services and managed Care (homecare) solutions for patients with chronic diseases. The company is certificated in accordance with ISO 9001, ISO 27001, ISO 13485 and licensed as a homecare provider of medical devices and treatment services according to German Social Law (SGB).

Enzo Biochem (ENZ: \$ 9.08)

Enzo Biochem closed the calendar year 2016 at \$6.94 a share. For the year it was up 54.22% versus the Dow Jones +13%. The relative strength index was 53.41 which is neutral and short interest declined to 827,800 shares. However the RSI has climbed to over 80 and is now 69.08 on April 1st, 2017. Enzo's balance sheet closed their first quarter October 31 with \$67 million in cash and current equivalents and complete elimination of debt. Both the Clinical Lab and Life Science divisions ended the year profitably. New products were added to their catalog and litigations have moved ahead leaving them as a plaintiff with 6 lawsuits in the Delaware Court and one in the Manhattan Court.

What do I look for in 2017? The market will be interesting in the first half with the Government transition to a new administration. Abbots Summary Judgement request was denied by the Court but the trial date has yet to be set. At some point the 2nd Court of Appeals will rule on Enzo's appeal on the CT. Courts reversal of the Jury's decision in the Enzo vs. Apalera Case. The market is giving no value, win or lose, to this decision. The stake is \$65 million with no adverse effect if ruled against Enzo. Enzo should again outperform the Dow and S&P in 2017.

Updates on Delaware Litigation

The last earnings report showed a cash position in excess of \$65 million with no debt to speak of and a positive cash flow from their operating divisions. The only cash burn is coming from Litigation expenses and a bit from Research and Development. Litigation in Delaware is on a contingency basis as such Enzo is not on the hook for billable hours. To my knowledge there are 6 suits left after 6 have settled.

When the company gets a 500 million dollar market cap (\$10.63) they will qualify for those Institutions that can't buy microcap stocks. A significant number of Institutions will look to be buyers and with only 47 million shares issued and Institutions already owning 50% and insiders owning 15% that leaves less than 17 million shares in the float.

Pressure Bio Sciences OTCQB: PBIO (0.22)*

Recently announced the signing of a new CFO Mr. Joseph L. Damasio Jr. Mr. Damasio has over 20 years of finance and accounting experience most recently as Finance Director at Nelipak Packaging, a private equity backed medical packaging manufacturer with over \$ 100 million in global annual sales. Before joining Nelipak, Mr. Damasio held financial positions at CP Bourg, IQEKC, and Kopin Corporation. Mr Damasio was employed by Pressure BioSciences as both accounting manager (2007) and controller (2008) and finally as Vice President of Finance and Administration (2011).

The hiring of Mr Damasio will allow the Company's CEO Mr Richard T Schumacher, who has been the company's interim CFO for the past two years, and who has been a successful serial life sciences entrepreneur with three successful publicly traded companies to his credit, time to focus on critical operational issues in 2017. Some issues to be attended to include a pending up-list to NASDAQ and their stated goal to build a field sales team this year.

PBIO Develops, markets, and sells proprietary laboratory instrumentation and associated consumables to the estimated \$6 billion life sciences sample preparation market. Products are based on the unique properties of both constant (i.e., static) and alternating (i.e., pressure cycling technology, or PCT) hydrostatic pressure. PCT is a patented enabling technology platform that uses alternating cycles of hydrostatic pressure between ambient and ultra-high levels to safely and reproducibly control bio-molecular interactions. To date, they have installed over 250 PCT systems in approximately 160 sites worldwide. There are over 100 publications citing the advantages of the PCT platform over competitive methods, many from key opinion leaders.

NEEDS IN MEDICINE: In the world of medicine our dramatically improved ability for early detection or to confirm and refine diagnosis ranging from over a hundred types of cancer to tuberculosis and a hundred other maladies and conditions is “bottlenecked” by 30 year old methods of preparing test samples. Collectively such diagnostic samples exceed a hundred million annually.

NEEDS IN RESEARCH: Globally there are over a half a million medical and pharmaceutical research scientists working in over eighty thousand laboratories who are hampered by the time consuming and outdated methods of preparing test samples.

NEEDS IN FORENSICS: Globally, in millions of cases, swift and sure exoneration of the innocent and / or justice for the guilty is often delayed or even denied because of the ponderous means of preparing and conducting DNA and other forensic testing.

PBIO is focused on solving the challenges of biological sample preparation, a crucial laboratory step performed globally by the biological life sciences research scientists. Sample preparation refers to a wide range of activities that precede most forms of scientific analysis. It is often complex, time-consuming and, in our opinion, one of the most error-prone steps of scientific research. Sample preparation is a ubiquitous laboratory undertaking - the requirements of which drive a large and growing worldwide market. PBIO has developed and patented a novel, enabling technology platform that can control the sample preparation process while improving both efficacy and quality. It is based on harnessing the unique properties of high hydrostatic pressure. This process, called pressure cycling technology, or PCT, uses alternating cycles of hydrostatic pressure between ambient (normal atmosphere) and ultra-high levels i.e., 35,000 pounds per square inch (“*psi*”) or greater to safely, conveniently and reproducibly control the actions of molecules in biological samples, such as cells and tissues from human, animal, plant and microbial sources.

The PBIO pressure cycling technology uses proprietary and internally developed instrumentation that is capable of cycling pressure between ambient and ultra-high levels at controlled temperatures and specific time intervals, to rapidly and repeatedly control the interactions of bio-molecules, such as deoxyribonucleic acid (“*DNA*”), ribonucleic acid (“*RNA*”), proteins, lipids and small molecules. Their laboratory instrument, the Barocycler[®], and their internally developed consumables product line, which include Pressure Used to Lyse Samples for Extraction (“*PULSE*”) tubes, and other processing tubes, and application specific kits such as consumable products and reagents, together make up their **PCT Sample Preparation System (“*PCT SPS*”).**

The PBIO pressure cycling technology takes a unique approach that has the potential for broad use in a number of established and emerging life sciences areas, which include:

- *Biological sample preparation in potentially thousands of research laboratories worldwide working in human, animal, plant, and microbial diseases and disorders - including but not limited to sample extraction, homogenization, and digestion in genomic, proteomic, lipidomic, metabolomic and small molecule study areas;*
- *Pathogen inactivation (useful in vaccine development, infectious disease research, and more);*
- *Protein purification, and in the control of chemical reactions, particularly enzymatic (useful in drug design and development);*

- *and immunodiagnostics (useful in the development and detection of biomarkers).*

INTELLECTUAL PROPERTY

PBIO has secured their technology through fourteen issued United States patents and ten issued foreign patents covering multiple applications of pressure cycling technology in the life sciences field. They also have additional patents pending. Research indicates that Pressure Bio Science, Inc. is the only company globally to have patents in this new science sector.

NightFood, Inc. (NGTF 0.33)*

Has healthy night-time food specially formulated for nighttime snackers. The Company has an exclusive agreement with RFI, natural ingredient manufacturer and proprietor of Chocamine, a patented cocoa extract which helps with cravings and mood (calmness), and promotes feelings of satiety.

Americans keep gaining more weight. People have the tendency to grab for goodies at the end of the evening as they relax to enjoy some T.V. Eating and snacking too late at night is a contributing factor to gaining weight. Seventy percent of adults, ages 18-54, snack in the hour or two before bed. Chocamine delivers the health benefits of chocolate to the body (amino acids, minerals and polyphenols) without the added sugars, caffeine or fat.

People give in to the intense hunger cravings that leads to the consumption of sugary, salty or calorie dense foods to satisfy their appetite and cravings. Most of the snacks that people typically eat can impair sleep, causing a person to wake up feeling unrested. Night Food offers better-for-you alternatives to high-calorie and sleep disruptive junk foods.

The company product line currently includes snack bars in two flavors, either Cookies and Dreams or Midnight Chocolate Crunch. The company recently reported that it is looking into expanding the number of flavors in the NightFood bar line, and also manufacturing products in different snack formats, like ice cream or “bites”

Consumers spend over \$50 billion/year on night-time snacks...over \$1B every week. In general, snacking trends have shifted much healthier over the past several years, but industry research continues to show that the least healthy choices of the day occur as we get closer to bedtime. In fact, the four most popular nighttime snack categories, in order, are salty snacks (chips, pretzels, popcorn), ice cream, chocolate candy, and cookies.

Management believes that, just as there are energy versions of many popular foods (energy jerky, energy candy, energy waffles, energy gum, energy chips, energy bars), foods can also be formulated to be more nighttime appropriate and sleep-friendly.

We've seen it happen with low-carb, we've seen it happen with gluten-free. Can it happen with nighttime snacking as well?

Leo Motors (LEOM: \$ 0.105)*

LEOM has patents for the electric battery industry which we will be writing about in upcoming weekly reports. They have developed a lithium battery that can operate vehicles in sub-zero climates. Their subsidiary LGM has developed battery technology supported by the Korean government to make it possible to use electric battery technology for fishing boats. They have a cartridge system which is a light-weight replacement method of swapping electric batteries.

Fishing has been harmed by the noise and oil leaks from internal combustion engines. LGM has solved that problem and besides eliminating the toxic problem, operating costs are reduced by 25%.

In addition they have a special patent for averting electric hazards and shocks. Leo developed the Internet of Things for e-boats which is networked and connected with an Android Operating System. Leo's power supply system is CAN (Controller Area Network) based, which enables mobile diagnostics between mobile devices and boats using the Leo technology.

Leo is developing a battery swap system for Kalmado in Puerto Princesa, Philippines, a world famous tourist attraction, which is focused on green energy. They will be converting 100 boats as the environment is expected to become 100% free of the toxicity from internal combustion engines. Also, Leo has developed a battery swap system for Go-Karts to be used in malls in China, Korea and Myanmar. Leo Motors has a new carbon nanotube battery power pack that functions and supplies full power in extreme low temperatures such as below 49 degrees without the need for grid electricity.

Skinvisible (SKVI: \$ 0.03)*:

SKVI has developed skin care products using its patented Invisicare polymer delivery systems and transdermal cannabis products from hemp-derived CBD, with its new developments to include cannabinoids from marijuana CBD and THC.

Skinvisible Brings Patented Technology to the Topical and Transdermal Cannabis Industry

Invisicare Delivery System to Enhance Medical and Recreational Marijuana Product Lines

Skinvisible Pharmaceuticals, Inc., developers of over 40 topical prescription (Rx), over-the-counter (OTC) and cosmeceutical products using its patented Invisicare® polymer delivery systems, announces it has now additionally developed topical and transdermal cannabis products from hemp-derived CBD; with its next developments to include cannabinoids from marijuana (CBD and THC).

Rule 17B Attestations and Disclaimers

Princeton Research, Inc. has approximately 2,581,578 shares of AIVN both free and restricted and represents them for Investor relations. Princeton also has about 40,000 shares of TXGE. Princeton is paid \$ 1,500 per month from RMS Medical Products. Princeton has bought 81,100 shares of RMS Medical Products. Princeton was paid \$ 2,500 to write a report on Xinery. Princeton has signed a contract with CBLI to be paid \$ 2500 for July and August for investor relations. Princeton has been engaged by Target Energy. No contract is currently in place. Princeton was paid about 500,000 restricted shares of Leo Motors.

When there is no movement in penny stocks, even though there is none or very small losses, we will liquidate (sold AIVN on stop) even though we like the company, if money is needed for better opportunities.

We now believe REPR represents upside opportunity. The Target ADR trades at about \$ 4.50 in U.S. vs 0.05 in Australia. Princeton owns 400,000 Australia shares and about 900 U.S. ADR's.

Pursuant to the provisions of Rule 206 (4) of the Investment Advisers Act of 1940, readers should recognize that not all recommendations made in the future will be profitable or will equal the performance of any recommendations referred to in this e-mail issue. Princeton may buy or sell its free-trading shares in companies it represents at any time.
