#### **Investing Trade Alerts Charles Moskowitz Discussion**

This market has new closing highs in both the S&P500 and the NASDAQ while the DJIA is only 9 points or so off its high close. The outlier is again the DJ Transports, but it too is in striking distance with only a day or two of solid performance.

The problem for me is the extreme divergences in what the “other” markets are telling us; oil is lower on lack of enough demand vs. supply, commodities such as copper, iron ore, rebar and other building materials are all lower, the Baltic Dry index (shipping) has been going nowhere but down of late, and the yield curve has flattened. While we have the lowest unemployment in recent history, the wages component shows no real pressure to the upside and while the published rate of 4.4% looks pretty good, the U6 number (including participation rate) is still 8.9%. Add to this a GDP growth of less than 1% for Q1 and you really have to wonder what to believe.

A very sharp friend of ours sent along an article this week talking about the VIX and its lack of help as an indicator of late. It’s interesting from the standpoint of what it opines has happened to the VIX trade and how it has “delegitimized” this measurement.

When this happens, and it always does, the last ones in are hurt the worst. But beyond that, this time it seems to me to be even worse, since the market has moved higher and for longer. In 1987 the issue was selling naked puts and it was only in vogue for a year or two during which the market “only” moved 150% from its breakout in 1982. This time we’ve moved 300% since the lows of 2009 in the most complacent period in the history of the stock market. It has been so ingrained as a “buy the dips” mindset that I shudder to think what could happen if we encounter a real problem.

Most individual investors consider that the best way for them to maintain a diversified portfolio of stocks is to buy and index fund like the SPY (S&P500 ETF) and call it a day. On the face of it, this makes all the sense in the world, right up until the whole world of traders and other “fund of funds” decide that if the lowest cost and easiest way for them to do no worse than to match the index by which they are judged is to own nothing but that index. This creates another very crowded trade that may (or may not) perform for you as a solid tool for diversification if the “trade” is using it as a single index. If you don’t own the SPY, you should still have some SPY puts. The only reason I did not add any this past week was because we had such wishy-washy days that I never got the chance, but I still favor some short-dated just out of the money puts and any new commitments will be texted this week...*CAM*

**Investing Trade Alerts Summary**  
**\$10,000 Trading Account Trade Table**

DATE	TRADES	PRICE	COST	PROCEEDS	RESULTS
05/05	Bought 6 AKAM June \$ 55 Calls	0.70	420		
05/02	Sold 6 GLD May \$121 Calls ( 50% Loss Rule )	0.60		366	366 <b>Loss</b>
05/01	Bought 2 SJM June \$ 170 Calls	1.70	340

## Fundamental Analysis Stocks To Buy with Stops

Using fundamentals the following are stocks to trade hypothetically. They have done well. We have taken numerous profits as indicated on the table below. In addition many have been stopped out with small losses. All indicated on the table below, balance is critical.

Alibaba has made a few points. We are raising the stop loss price.

We have no position in Alcoa AA.

Flushing Financial FFIC fell below the 50 day price moving average on March 3<sup>rd</sup>, which was a selling opportunity. We would take profits in the Flushing Financial.

Boeing is on its way to \$ 200.

We are disappointed with Bristol Myers. We originally bought BMY at \$ 49.20 back on October 17<sup>th</sup>, sold on stop at 55.45 December 7<sup>th</sup>.

Sell if you are long Hecla Mining, which had been previously stopped out profitably at \$ 5.64 on Dec 15<sup>th</sup>.

We took profits on ENZ but still want to buy at lower prices.

The HDGE is not relevant at this time.

Symbol	Name	Business Description	PE	P/S	MV mln	Price	Buy or Sell Limit	Stop Loss Or offset
BABA	<b>Alibaba</b>	China Similar to Amazon	50.67	13.21	275.5B	116.04	Bought @ \$ 111 on 4/7/17 opening	112x

MOS	100	43.55	08/14			
HL	500	3.95	05/03			
SAN	600	8.40	12/16			
TEXQY	200	6.56	7/11			
REPR*	5000	0.22	10/22/12			

**Recommendations will be both listed in this letter and texted to members.**

**Previous closed out stock and option positions can be found in past Market Strategies Newsletter issues available in the VIP Subscribers Members Area.**

For those of you who do not buy puts to protect your portfolio, there are many ETF's that are the inverse of the DOW. The symbols are **DOG, DXD, SDS, TZA and RWM**, which go up when the DOW, S&P 500 and Russell 2000 go **down and down when they go up. The DZZ goes up double when gold goes down.**

### **Market Strategies \$100,000 Trading Account**

There was one options trade;

the purchase and sale of 12 GLD May 121 Calls at \$ 1.21, and sold on the 50% Loss Rule at \$ 0.60 for a debit of \$ 732.

The net in options trading was that loss of the \$ 732.

The stock trading made a gain of \$ 1339.

The CTL also provided a dividend of \$ 243 that we have not included in the results.

For the entire last two years on closed out trades, our hypothetical profits increased by \$ 607 to \$44,242.

Open trade losses decreased by \$ 1,360 from \$15,336 to \$13,976.

The options expire on the third Friday of each Month unless otherwise posted.

The Stock table has the following 17 positions: AGQ, AMBA, EYES( 2 ), HL, MOS ( 2 ), NUGT, REPR, RWM, SAN, SPXU,TEXQY, TWTR, VRX (2) and the YANG

:

The options call for a \$ 2,500 investment unless otherwise stated; each stock position requires \$5,000 unless otherwise mentioned specifically.

Money management is based on a hypothetical \$ 100,000.

The 17 stock positions would cost \$ 71,620.

The four long options positions, the 10 HL June 6 Calls and the 4 SJM June 130 Calls

and the 6 AKAM June 55 Calls would require \$ 1,320

when combined with the stock requirement of \$ 71,620

equals \$72,940

which leaves excess cash of \$ 27,060.

These figures are approximate and there might be errors.

The trading is hypothetical and we do not count commission costs.

Executions that have occurred at or near the open or close of trading sometimes vary from our actual numbers. For example, when something opens down and it is through our price, we take the next trade whether it is an uptick or continues lower. This sometimes results in a 50% trade that is slightly above or below the exact number.

### **Previous Week's Recommendations and Rules for the Market Strategies \$100,000 Portfolio Trading Account**

- All options count for about \$ 2,500.00 for model portfolio calculations unless otherwise stated
- When the option has doubled sell half the position
- Stop Loss protection is either half or offered with each trade
- The cost of the option is the asking price (or the price between the bid and ask, whichever is more realistic)
- The options will be followed until closed out.
- Option Symbols are stock symbol with expiration month and strike price

Option	Cost	Date	Sold	Date	Profit/ (Loss)
AKAM June 55 12 lots	Calls 0.70	05/05/17			

SJM June 130 Calls 8 lots	Calls 1.70-4 1.60-4	05/01/17			
GLD May 121 12 lots	Calls 1.21	04/25/17	\$ 0.60	05/02/2017	( \$ 732 )
HL June 6 20 lots	Calls 0.24	04/21/17	( 50% Loss Rule )		

Recommendations will be both listed in this letter and texted to members.

Previous closed out stock and option positions can be found in past Market Strategies Newsletter issues available in the VIP Subscribers Members Area.

### **Undervalued Small Cap Stocks**

**Lower Priced stocks that look to be a buy:**

#### **Repro-Med Systems, Inc. (OTCQX: REPR 0.44 )\***

CHESTER, NY / March 25, 2017 / Repro Med Systems, Inc. dba RMS Medical Products (OTCQX: REPR) ("RMS" or the "Company") Repro Med Systems, Inc. dba RMS Medical Products (OTCQX: REPR) ("RMS" or the "Company") is pleased to announce that the umbrella organization of the public health insurance in Germany approved the FREEDOM60<sup>®</sup> Infusion System for reimbursement. The FREEDOM60<sup>®</sup> System was registered January, 31<sup>st</sup> 2017 and listed in the Medical Device Registry in the category mechanical infusion pumps. It is the ONLY device of its kind registered within Germany.

In partnership with **ContraCare** GmbH, a leader in Germany for **Contract Management** (reimbursement services) and managed **Care**, the RMS FREEDOM60<sup>®</sup>, FreedomEdge<sup>®</sup>, RMS Precision Flow Rate Tubing<sup>™</sup> and RMS HlgH-Flo Subcutaneous Safety Needle Sets<sup>™</sup> are now poised to dominate this growing market in Europe.

Torsten Kühn, Chief Executive Officer of ContraCare, commented “as a premium service provider in Germany’s health care system, we aim to partner with leading suppliers to provide the best drugs, medical devices and services to our patients while keeping an eye on the cost efficiency of the treatments we provide. The RMS FREEDOM60<sup>®</sup> system with its durable and reliable syringe driver and high-quality HlgH-Flo<sup>™</sup> subcutaneous safety needle sets are exactly the products we needed for immunoglobulin, antibiotic and many other therapies we are providing today. We are glad that the umbrella organization of Germany’s public health insurance confirms the unmet need by approving the RMS FREEDOM60<sup>®</sup> System for reimbursement.”

Eric Bauer, Chief Operating Officer of RMS commented, “It can take 12 to 14 months to obtain country registration; by partnering with a leading health care provider, that time was cut significantly. Contra Care is an exceptional partner and we could not be more pleased with our relationship. Germany is going to be a great market for our high quality products and our ever expanding product line. RMS continues to be the Global industry leader and create exceptional partnerships around the world to improve patient quality of life.”

RMS Medical Products is the leading manufacturer of medical products used for home infusions and suctioning. The Infusion product portfolio currently includes the FREEDOM60<sup>®</sup> and our latest Freedom Edge<sup>®</sup> Syringe Infusion Drivers, RMS Precision Flow Rate Tubing<sup>™</sup> and RMS HlgH-Flo Subcutaneous Safety Needle Sets<sup>™</sup>. These devices are used for infusions administered in professional healthcare settings as well as at home. The Company's RES-Q-VAC<sup>®</sup> line of medical suctioning products is used by emergency medical service providers in addition to a variety of other healthcare providers. The Company's website may be visited at [www.rmsmedicalproducts.com](http://www.rmsmedicalproducts.com).

Contra Care GmbH, based in Nuremberg, Germany, is specialized in providing Contract Management (reimbursement) Services and managed Care (homecare) solutions for patients with chronic diseases. The company is certificated in accordance with ISO 9001, ISO 27001, ISO 13485 and licensed as a homecare provider of medical devices and treatment services according to German Social Law (SGB).

RMS Medical Products is the leading manufacturer of medical products used for home infusions and suctioning. The Infusion product portfolio currently includes the FREEDOM60<sup>®</sup> and our latest FreedomEdge<sup>®</sup> Syringe Infusion Pumps, RMS Precision Flow Rate Tubing<sup>™</sup> and RMS HlgH-Flo<sup>™</sup> Subcutaneous Safety Needle Sets. These devices are used for infusions administered in professional healthcare settings as well as at home. The Company's RES-Q-VAC<sup>®</sup> line of medical suctioning products is used by emergency medical service providers in addition to a variety of other healthcare providers. The Company's website may be visited at <http://www.rmsmedicalproducts.com>.

## **Enzo Biochem ( ENZ: \$ 8.80 )**

Enzo Biochem closed the calendar year 2016 at \$6.94 a share. For the year it was up 54.22% versus the Dow Jones +13%. The relative strength index was 53.41 which is neutral and short interest declined to 827,800 shares. However the RSI has climbed to over 80 and is now 69.08 on April 1<sup>st</sup>, 2017. Enzo's balance sheet closed their first

quarter October 31 with \$67 million in cash and current equivalents and complete elimination of debt. Both the Clinical Lab and Life Science divisions ended the year profitably. New products were added to their catalog and litigations have moved ahead leaving them as a plaintiff with 6 lawsuits in the Delaware Court and one in the Manhattan Court.

What do I look for in 2017? The market will be interesting in the first half with the Government transition to a new administration. Abbots Summary Judgement request was denied by the Court but the trial date has yet to be set. At some point the 2nd Court of Appeals will rule on Enzo's appeal on the CT. Courts reversal of the Jury's decision in the Enzo vs. Apalera Case. The market is giving no value, win or lose, to this decision. The stake is \$65 million with no adverse effect if ruled against Enzo. Enzo should again outperform the Dow and S&P in 2017.

#### Updates on Delaware Litigations

The last earnings report showed a cash position in excess of \$65 million with no debt to speak of and a positive cash flow from their operating divisions. The only cash burn is coming from Litigation expenses and a bit from Research and Development. Litigation in Delaware is on a contingency basis as such Enzo is not on the hook for billable hours. To my knowledge there are 6 suits left after 6 have settled.

When the company gets a 500 million dollar market cap (\$10.63) they will qualify for those Institutions that can't buy microcap stocks. A significant number of Institutions will look to be buyers and with only 47 million shares issued and Institutions already owning 50% and insiders owning 15% that leaves less than 17 million shares in the float.

### **Pressure Bio Sciences OTCQB: PBIO ( 0.28 )\***

**Recently announced the signing of a new CFO Mr. Joseph L. Damasio Jr.** Mr. Damasio has over 20 years of finance and accounting experience most recently as Finance Director at Nelipak Packaging, a private equity backed medical packaging manufacturer with over \$ 100 million in global annual sales. Before joining Nelipak, Mr. Damasio held financial positions at CP Bourg,IQEK, and Kopin Corporation. Mr Damasio was employed by Pressure BioSciences as both accounting manager ( 2007 ) and controller ( 2008 ) and finally as Vice President of Finance and Administration ( 2011 ).

**PBIO** Develops, markets, and sells proprietary laboratory instrumentation and associated consumables to the estimated \$6 billion life sciences sample preparation market. Products are based on the unique properties of both constant (i.e., static) and alternating (i.e., pressure cycling technology, or PCT) hydrostatic pressure. PCT is a patented enabling technology platform that uses alternating cycles of hydrostatic pressure between ambient and ultra-high levels to safely and reproducibly control bio-molecular interactions. To date, they have installed over 250 PCT systems in approximately 160 sites worldwide. There are over 100 publications citing the advantages of the PCT platform over competitive methods, many from key opinion leaders. The primary development and sales efforts are in the biomarker discovery, drug discovery and design, and forensics areas. Customers also use PBIO products in other areas, such as bio-therapeutics characterization, soil & plant biology, vaccine development, and counter-bioterror applications.

**NEEDS IN MEDICINE:** In the world of medicine our dramatically improved ability for early detection or to confirm and refine diagnosis ranging from over a hundred types of cancer to tuberculosis and a hundred other maladies and conditions is "bottlenecked" by 30 year old methods of preparing test samples. Collectively such diagnostic samples exceed a hundred million annually.

**NEEDS IN RESEARCH:** Globally there are over a half a million medical and pharmaceutical research scientists working in over eighty thousand laboratories who are hampered by the time consuming and outdated methods of preparing test samples.

**NEEDS IN FORENSICS:** Globally, in millions of cases, swift and sure exoneration of the innocent and / or justice for the guilty is often delayed or even denied because of the ponderous means of preparing and conducting DNA and other forensic testing.

**PBIO** is focused on solving the challenges of biological sample preparation, a crucial laboratory step performed globally by the biological life sciences research scientists. Sample preparation refers to a wide range of activities that precede most forms of scientific analysis. It is often complex, time-consuming and, in our opinion, one of the most error-prone steps of scientific research. Sample preparation is a ubiquitous laboratory undertaking - the requirements of which drive a large and growing worldwide market. PBIO has developed and patented a novel, enabling technology platform that can control the sample preparation process while improving both efficacy and quality. It is based on harnessing the unique properties of high hydrostatic pressure. This process, called **pressure cycling technology, or PCT**, uses alternating cycles of hydrostatic pressure between ambient (normal atmosphere) and ultra-high levels i.e., 35,000 pounds per square inch (“*psi*”) or greater to safely, conveniently and reproducibly control the actions of molecules in biological samples, such as cells and tissues from human, animal, plant and microbial sources.

The PBIO pressure cycling technology uses proprietary and internally developed instrumentation that is capable of cycling pressure between ambient and ultra-high levels at controlled temperatures and specific time intervals, to rapidly and repeatedly control the interactions of bio-molecules, such as deoxyribonucleic acid (“*DNA*”), ribonucleic acid (“*RNA*”), proteins, lipids and small molecules. Their laboratory instrument, the Barocycler<sup>®</sup>, and their internally developed consumables product line, which include Pressure Used to Lyse Samples for Extraction (“*PULSE*”) tubes, and other processing tubes, and application specific kits such as consumable products and reagents, together make up their **PCT Sample Preparation System (“*PCT SPS*”).**

The PBIO pressure cycling technology takes a unique approach that has the potential for broad use in a number of established and emerging life sciences areas, which include:

- *Biological sample preparation in potentially thousands of research laboratories worldwide working in human, animal, plant, and microbial diseases and disorders - including but not limited to sample extraction, homogenization, and digestion in genomic, proteomic, lipidomic, metabolomic and small molecule study areas;*
- *Pathogen inactivation (useful in vaccine development, infectious disease research, and more);*
- *Protein purification, and in the control of chemical reactions, particularly enzymatic (useful in drug design and development);*
- *and immunodiagnostics (useful in the development and detection of biomarkers).*

## **INTELLECTUAL PROPERTY**

PBIO has secured their technology through fourteen issued United States patents and ten issued foreign patents covering multiple applications of pressure cycling technology in the life sciences field. They also have additional patents pending. Research indicates that Pressure Bio Science, Inc. is the only company globally to have patents in this new science sector.

**Night Food, Inc. (NGTF 0.17)\*** is a wholly-owned subsidiary of Night food Holdings incorporated in Nevada in 2013 to manufacture and distribute healthy-choice bedtime snacks. The Company has an exclusive agreement with RFI, natural ingredient manufacturer and proprietor of *Chocamine*, a patented chocolate ingredient

Americans keep gaining more weight. People have the tendency to grab for goodies at the end of the evening as they relax to enjoy some T.V. Eating and snacking too late at night is a contributing factor to gaining weight. Seventy percent of adults, ages 18-54, eat right before bed. Chocamine delivers the health benefits of chocolate to the body (amino acids, minerals and polyphenols) without the added sugars, caffeine or fat.

People give in to the intense hunger cravings that leads to the consumption of sugary, salty or calorie dense foods to satisfy their appetite. Most of the snacks that people typically eat create a disturbance in sleep, causing a person to wake up feeling unrested. Night Food offers nutrient filled alternatives to high-calorie junk foods. There are flavor filled snack bars-either *Cookies and Dreams* or *Midnight Chocolate Crunch* that will help curb hunger, satisfy cravings, improve rest and give the body essential vitamins and minerals.

Consumers spend over \$50 billion/ year on night-time snacks, nearly 1 billion a week. More people desire healthy alternatives to late night consumption of the traditional fattening ice cream, chips and cookies.

Sugar and caffeine in most snacks causes disruptive sleep. Each bar has only 142 calories and 5 grams of fiber for slow absorption of energy and gives a feeling of fullness and satisfaction. There is also 132 mg of calcium and zinc for replenishing the body and feeling well rested in the morning.

**Leo Motors (LEOM: \$ 0.12)\*** has patents for the electric battery industry which we will be writing about in upcoming weekly reports. They have developed a lithium battery that can operate

vehicles in sub-zero climates. Their subsidiary LGM has developed battery technology supported by the Korean government to make it possible to use electric battery technology for fishing boats. They have a cartridge system which is a light-weight replacement method of swapping electric batteries.

Fishing has been harmed by the noise and oil leaks from internal combustion engines. LGM has solved that problem and besides eliminating the toxic problem, operating costs are reduced by 25%.

In addition they have a special patent for averting electric hazards and shocks. Leo developed the Internet of Things for e-boats which is networked and connected with an Android Operating System. Leo's power supply system is CAN (Controller Area Network) based, which enables mobile diagnostics between mobile devices and boats using the Leo technology.

Leo is developing a battery swap system for Kalmado in Puerto Princesa, Philippines, a world famous tourist attraction, which is focused on green energy. They will be converting 100 boats as the environment is expected to become 100% free of the toxicity from internal combustion engines. Also, Leo has developed a battery swap system for Go-Karts to be used in malls in China, Korea and Myanmar. Leo Motors has a new carbon nanotube battery power pack that functions and supplies full power in extreme low temperatures such as below 49 degrees without the need for grid electricity.

**Skinvisible ( SKVI: \$ 0.025 )** they have developed skin care products using its patented Invisicare polymer delivery systems and: transdermal cannabis products from hemp-derived CBD, with its new developments to include cannabinoids from marijuana CBD and THC.

## **Rule 17B Attestations and Disclaimers**

Princeton Research, Inc. has approximately 2,581,578 shares of AIVN both free and restricted and represents them for Investor relations. Princeton also has about 40,000 shares of TXGE. Princeton is paid \$ 1,500 per month from RMS Medical Products. Princeton has bought 81,100 shares of RMS Medical Products. Princeton was paid \$ 2,500 to write a report on Xinery. Princeton has signed a contract with CBLI to be paid \$ 2500 for July and August for investor relations. Princeton has been engaged by Target Energy. No contract is currently in place. Princeton was paid about 500,000 restricted shares of Leo Motors.

When there is no movement in penny stocks, even though there is none or very small losses, we will liquidate ( sold AIVN on stop ) even though we like the company, if money is needed for better opportunities.

We now believe REPR represents upside opportunity. The Target ADR trades at about \$ 4.50 in U.S. vs 0.05 in Australia. Princeton owns 400,000 Australia shares and about 900 U.S. ADR's.

Pursuant to the provisions of Rule 206 (4) of the Investment Advisers Act of 1940, readers should recognize that not all recommendations made in the future will be profitable or will equal the performance of any recommendations referred to in this e-mail issue. Princeton may buy or sell its free-trading shares in companies it represents at any time.
