**Charles Moskowitz Traders Discussion**

Week 16 was a miraculous gain of \$365 after taking a 100% loss on the position in VRX calls that gapped down to \$ .01 on the news that long-time bull, Bill Ackman had sold his entire position. That trade cost us \$540, so any gain for a week that we saw less than .05% change in the Dow was quite a feat. YTD gains were \$3625, a new closing high. We finished the week with only one open position in HL June \$6 calls and using only \$240 of funds.

The rest of the markets showed better returns for the week with the DJ Transports +2.92%, Russell +2.57%, S&P 500 + .85% and the NASDAQ gaining 1.82%. However, the A.A.I.I. sentiment numbers still show the bulls falling further to only 25.7 %, a solid 34% below historic average. This is a “contrary” indicator and falls into the category of one of my favorite quotes, “everyone is never right.”

We also had an oil market that added some weakness as we banged up against the overhead supply at \$54.00 and could not make any further headway. While there is some support around \$47.50-48.50, the real support is in the \$45-46 range. One of the most perplexing divergences right now is the movement in gold vs. silver. While the gold was up 2.7% this week, silver was -3.6%. Since silver is generally more in demand for industrial uses and is commonly traded as a lower priced way to take advantage of the US\$ moves, they generally move in the same direction. In fact, they are both up about 8.5% each YTD. We are taking advantage of this by being long the AGQ (3X silver ETF) and HL 6/6 calls. Unless the gold starts to falter, I believe the silver will be dragged along.

The Trump administration is faced with a pretty major test in the next week with the need for passage of funding bill before we have yet another government shutdown. If they prove to be so inept as to not get it together, this would be a message that can't be ignored and put the markets on the defensive.

On the geopolitical front we have the French primaries today and tonight. As of this writing, it is too early to have any results. I would be surprised if it causes us any real problems, but election results have been unknowable of late so we'll just have to wait and see.

As far as other sectors, the XLF (financials) looks oversold, but a stop @ \$22.65 on a close defines the risk. The XRT (retail) has made some headway and bounced off \$40.75 this week. I'm not terribly impressed with it and it is not as oversold as its long downtrend would imply..... *CAM*

Your Membership includes access to both:

**Trade Alerts by Text Message and e-mail  
AND  
The Market Investing Strategies Newsletter  
Full Members Only Edition**

Our Where To Invest Now For Profits In Up or Down Markets Newsletter is more compact, informative, effective and quicker to read than the major, big name publications. AND there are NO ADS to wade through.

The Members Edition Newsletter is sent to you by e-mail Monday Mornings and available in the Members Area along with our archive of past issues.

### **A Sample of the Where To Invest Now Newsletter Information Our Members Get Follows**

#### **Market Strategies Technical Information**

Support/Resistance Levels:	SUPPORT	RESISTANCE
S&P 500	2291	2364
Dow	20,070	20,780
QQQ	129.00	133.60
Transports	87.90	9310
NASDAQ	57.70	5995

#### **Fundamental Analysis Stocks To Buy with Stops**

Using fundamentals the following are stocks to trade hypothetically. They have done well. We have taken numerous profits as indicated on the table below. In addition many have been stopped out with small losses. All indicated on the table below. Balance is critical.

We want to be long Alcoa AA on a close above \$ 32.60.

Flushing Financial, FFIC fell below the 50 day price moving average, which was a buying opportunity. We are long FFIC at \$ 19.10 and are holding long the Flushing Financial.

Bank stocks are to be bought in this reaction phase after having continued bullish into the new year. You must use your own discretion on whether to take profits.

Boeing has gone to \$ 180.38, above the previous high at \$ 169.80-170.00, surging from a new high in defense stocks. We remain long. Boeing is on its way to \$ 200.

We re-bought Hecla HL at 5.24, which had been stopped out profitably at \$ 5.64 on Dec 15<sup>th</sup>. Stay or try to be long Hecla.

We took profits on ENZ.

The HDGE is not relevant at this time.

We are looking to buy the GSCI symbol GSG, a commodity indexed fund managed by Goldman.

Symbol	Name	Business Description	PE	P/S	MV mln	Price	Buy or Sell Limit	Stop Loss Or offset
BABA	<b>Alibaba</b>	China Similar to Amazon	50.67	13.21	275.5B	113.11	Bought @ \$ 111 on 4/7/17 opening	98x

BAC	Bank of America	Commercial Bank	10	2.02	165.3B	22.34	Bought at 15.42 9/30/16	23.60x stopped out on 3/21/17
HDGE	Advisor Shares	Ranger Bear ETF				8.99	Stopped out at 9.01 2/10/17	Must close above 9.01 to be long :

## **\$100,000 Trading Portfolio Stock Positions and Trades**

Each stock is allocated a theoretical \$ 5,000 share of the portfolio unless otherwise indicated.

Symbol		Purchase Price	Purchase Date	Stop/Loss	Price/Date Sold	Profit/(Loss)
AGQ	150	40.39	04/07			
SCO	200	35.05	04/05			
VRX	200	11.08	03/16			
VRX	400	12.12	03/13			
NUGT	300	8.92	03/13			
RWM	100	50.60	11/21			
SPXU	200	22.88	11/14			
CTL	150	23.29	11/04			
AMBA	100	63.75	10/13			
MOS	200	27.53	05/02			
EYES	500	5.04	04/04			
EYES	1000	6.49	12/28			
TWTR	200	28.51	10/28			
MOS	100	43.55	08/14			
HL	500	3.95	05/03			
SAN	600	8.40	12/16			
TEXQY	200	6.56	7/11			
REPR*	5000	0.22	10/22/12			

**Recommendations will be both listed in this letter and texted to members.**

For those of you who do not buy puts to protect your portfolio, there are many ETF's that are the inverse of the DOW. The symbols are **DOG, DXD, SDS, TZA and RWM**, which go up when the

DOW, S&P 500 and Russell 2000 go **down and down when they go up. The DZZ goes up double when gold goes down.**

## **Where To Invest Market Strategies** **\$100,000 Trading Account**

There were five closed options positions:

The best trade was the sale of 20 SPY April 235 Puts sold @ \$ 0.80 for a gain of \$ 1180.

The 20 SPY April 235 Calls day-traded the same day bought at \$ 0.36 and sold at \$ 0.57 made \$420.

The AGQ Calls made \$ 240.

There were two losing trades all listed totaling a loss of \$ 1110.

The result was a gain of \$ 720.

There were no closed stock positions.

For the entire last two years on closed out trades, our hypothetical profits increased by \$ 730 to \$42,442.

Open trade losses increased to \$ 16,838.

The options expire on the third Friday of each Month unless otherwise posted.

The Stock table has the following 18 positions:

AGQ, AMBA, CTL, EYES ( 2 ), HL, MOS ( 2 ), NUGT, REPR, RWM, SAN, SCO, SPXU,TEXQY, TWTR, VRX (2) :

The options call for a \$ 2,500 investment unless otherwise stated; each stock position requires \$5,000 unless otherwise mentioned specifically.

The open profit on the 500 HL had been omitted.

Money management is based on a hypothetical \$ 100,000.

The 18 stock positions would cost \$ 76,089.

The 20 HL options positions require \$480,  
when combined equals \$76,569,  
which leaves excess cash of \$ 23,911.

These figures are approximate and there might be errors.

We have not counted the dividends received from many previous trades such as Apple, Colgate Palmolive, JP Morgan, Mosaic, North American Tankers, STNG and Santander, their Brazil affiliate BSBR and Blue Capital Reinsurance which was sold for a profit and many others.

The trading is hypothetical and we do not count commission costs.

Executions that have occurred at or near the open or close of trading sometimes vary from our actual numbers. For example, when something opens down and it is through our price, we take the next trade whether it is an uptick or continues lower. This sometimes results in a 50% trade that is slightly above or below the exact number.

### **Previous Week's Recommendations and Rules for the Market Strategies \$100,000 Portfolio Trading Account**

- All options count for about \$ 2,500.00 for model portfolio calculations unless otherwise stated
- When the option has doubled sell half the position
- Stop Loss protection is either half or offered with each trade
- The cost of the option is the asking price (or the price between the bid and ask, whichever is more realistic)
- The options will be followed until closed out.
- Option Symbols are stock symbol with expiration month and strike price

Option	Cost	Date	Sold	Date	Profit/ (Loss)
HL June 6 20 lots	Calls 0.24	04/21/17			
SPY April 235 20 lots	Puts 0.38	04/20/17	0.35	04/20/2017	( \$ 30 )
SPY April 235 20 lots	Calls 0.21	04/19/17	0.80	04/20/2017	\$ 1180
SPY April 235 20 lots	Calls 0.36	04/19/17	0.57	04/20/2017	\$ 420
AGQ April 42 12 lots	Calls 1.00	04/03/17	1.20	04/17/2017	\$ 240
VRX April 12.50 12 lots	Calls 0.90	03/13/17	Expired		( \$ 1080 )

**Recommendations will be both listed in this letter and texted to members.**

**Previous closed out stock and option positions can be found in past Market Strategies Newsletter issues available in the VIP Subscribers Members Area.**

## Undervalued Small Cap Stocks

**Lower Priced stocks that look to be a buy:**

### Repro-Med Systems, Inc. (OTCQX: REPR 0.41 )\*

Repro Med Systems, Inc. dba RMS Medical Products (OTCQX: REPR) (“RMS” or the “Company”) announced today the United States Food and Drug Administration (“FDA”) renewed the Company’s Certificate to Foreign Government (“CFG”). A CFG is issued for legally marketed devices in the U.S. that are in compliance with the requirements of the Federal Food, Drug, and Cosmetic Act (“FFDCA”). A CFG is required by many market regulators in Asia, Europe, the Middle East and Latin America in order to legally sell medical devices in their territories. The renewal of this CFG confirms RMS devices have been cleared for sale in the U.S. and are in compliance with the requirements of the FFDCA. The CFG can be presented to regulators in foreign markets as part of the medical device registration process. Foreign governments often seek official assurance that products exported to their countries can be marketed in the U.S. and meet specific U.S. regulations, for example, current Good Manufacturing Practice (“cGMP”) regulations and Quality System Regulations (“QSR”).

“The FDA renewal of our CFG is confirmation of our product clearances and that RMS meets specific U.S. regulations including cGMPs and QSRs,” said Eric Bauer, RMS Chief Operating Officer. “Our CFG allows RMS to continue our international expansion efforts and maintain our global leadership position. We are pleased the FDA recognizes the RMS Quality System meets U.S. regulations and that the FDA continues to support the sale of our products in the U.S., as well as other countries.”

RMS Medical Products is the leading manufacturer of medical products used for home infusions and suctioning. The Infusion product portfolio currently includes the FREEDOM60<sup>®</sup> and our latest FreedomEdge<sup>®</sup> Syringe Infusion Drivers, RMS Precision Flow Rate Tubing<sup>™</sup> and RMS HgH-Flo Subcutaneous Safety Needle Sets<sup>™</sup>. These devices are used for infusions administered in professional healthcare settings as well as at home. The Company’s RES-Q-VAC<sup>®</sup> line of medical suctioning products is used by emergency medical service providers in addition to a variety of other healthcare providers. The Company’s website may be visited at [www.rmsmedicalproducts.com](http://www.rmsmedicalproducts.com).

### Enzo Biochem ( ENZ: \$ 8.78 )\*

Enzo Biochem closed the calendar year 2016 at \$6.94 a share. For the year it was up 54.22% versus the Dow Jones +13%. The relative strength index was 53.41 which is neutral and short interest declined to 827,800 shares. However the RSI has climbed to over 80 and is now 69.08 on April 1st, 2017. Enzo's balance sheet closed their first quarter October 31 with \$67 million in cash and current equivalents and complete elimination of debt. Both the Clinical Lab and Life Science divisions ended the year profitably. New products were added to their catalog and litigations have moved ahead leaving them as a plaintiff with 6 lawsuits in the Delaware Court and one in the Manhattan Court.

What do I look for in 2017? The market will be interesting in the first half with the Government transition to a new administration. I think the Institutional Investor will be a bit more risk adverse until the direction of the economy becomes clearer. As far as Enzo the Company is concerned they will be having their Annual Shareholders Meeting on Thursday January 5 at 9 AM at the Yale Club in New York. It will be interesting to see how Management see's the Health Care Industry being affected by a change in the Affordable Care Act. The following week Management will be at the J P Morgan Health

Care Conference in San Francisco January 9-12. I would hope to see an increase in top line revenues reflecting National rollouts of the new AmpProbe products as well as others and more approvals of products in the pipeline. I also anticipate that we will hear the trial results from the NIH on the use of Optiquel for the treatment of Uveitis. March and April will see Summary Judgements acted on by the Court in the Delaware cases. Trial dates have already been set for Genprobe and Holgics for October, Roche in November and Becton Dickenson in December. Abbots Summary Judgement request was denied by the Court but the trial date has yet to be set. At some point the 2nd Court of Appeals will rule on Enzo's appeal on the CT. Courts reversal of the Jury's decision in the Enzo vs. Apalera Case. The market is giving no value, win or lose, to this decision. The stake is \$65 million with no adverse effect if ruled against Enzo. Enzo should again outperform the Dow and S&P in 2017.

#### Updates on Delaware Litigations

The last earnings report showed a cash position in excess of \$65 million with no debt to speak of and a positive cash flow from their operating divisions. The only cash burn is coming from Litigation expenses and a bit from Research and Development. Litigation in Delaware is on a contingency basis as such Enzo is not on the hook for billable hours. To my knowledge there are 6 suits left after 6 have settled.

When the company gets a 500 million dollar market cap (\$10.63) they will qualify for those Institutions that can't buy microcap stocks. A significant number of Institutions will look to be buyers and with only 47 million shares issued and Institutions already owning 50% and insiders owning 15% that leaves less than 17 million shares in the float.

#### **Pressure Bio Sciences OTCQB: PBIO ( 0.33 )\***

Recently announced the signing of a new CFO Mr. Joseph L. Damasio Jr. Mr. Damasio has over 20 years of finance and accounting experience most recently as Finance Director at Nelipak Packaging, a private equity backed medical packaging manufacturer with over \$ 100 million in global annual sales. Before joining Nelipak, Mr. Damasio held financial positions at CP Bourg,IQKCC, and Kopin Corporation. Mr Damasio was employed by Pressure BioSciences as both accounting manager ( 2007 ) and controller ( 2008 ) and finally as Vice President of Finance and Administration ( 2011 ).

PBIO Develops, markets, and sells proprietary laboratory instrumentation and associated consumables to the estimated \$6 billion life sciences sample preparation market. Products are based on the unique properties of both constant (i.e., static) and alternating (i.e., pressure cycling technology, or PCT) hydrostatic pressure. PCT is a patented enabling technology platform that uses alternating cycles of hydrostatic pressure between ambient and ultra-high levels to safely and reproducibly control bio-molecular interactions. To date, they have installed over 250 PCT systems in approximately 160 sites worldwide. There are over 100 publications citing the advantages of the PCT platform over competitive methods, many from key opinion leaders.

The primary development and sales efforts are in the biomarker discovery, drug discovery and design, and forensics areas. Customers also use PBIO products in other areas, such as bio-therapeutics characterization, soil & plant biology, vaccine development, and counter-bioterror applications.

NEEDS IN MEDICINE: In the world of medicine our dramatically improved ability for early detection or to confirm and refine diagnosis ranging from over a hundred types of cancer to tuberculosis and a hundred other

maladies and conditions is “bottlenecked” by 30 year old methods of preparing test samples. Collectively such diagnostic samples exceed a hundred million annually.

**NEEDS IN RESEARCH:** Globally there are over a half a million medical and pharmaceutical research scientists working in over eighty thousand laboratories who are hampered by the time consuming and outdated methods of preparing test samples.

**NEEDS IN FORENSICS:** Globally, in millions of cases, swift and sure exoneration of the innocent and / or justice for the guilty is often delayed or even denied because of the ponderous means of preparing and conducting DNA and other forensic testing.

PBIO is focused on solving the challenges of biological sample preparation, a crucial laboratory step performed globally by the biological life sciences research scientists. Sample preparation refers to a wide range of activities that precede most forms of scientific analysis. It is often complex, time-consuming and, in our opinion, one of the most error-prone steps of scientific research. Sample preparation is a ubiquitous laboratory undertaking – the requirements of which drive a large and growing worldwide market.

PBIO has developed and patented a novel, enabling technology platform that can control the sample preparation process while improving both efficacy and quality. It is based on harnessing the unique properties of high hydrostatic pressure. This process, called pressure cycling technology, or PCT, uses alternating cycles of hydrostatic pressure between ambient (normal atmosphere) and ultra-high levels i.e., 35,000 pounds per square inch (“*psi*”) or greater to safely, conveniently and reproducibly control the actions of molecules in biological samples, such as cells and tissues from human, animal, plant and microbial sources.

The PBIO pressure cycling technology uses proprietary and internally developed instrumentation that is capable of cycling pressure between ambient and ultra-high levels at controlled temperatures and specific time intervals, to rapidly and repeatedly control the interactions of bio-molecules, such as deoxyribonucleic acid (“*DNA*”), ribonucleic acid (“*RNA*”), proteins, lipids and small molecules. Their laboratory instrument, the Barocycler<sup>®</sup>, and their internally developed consumables product line, which include Pressure Used to Lyse Samples for Extraction (“*PULSE*”) tubes, and other processing tubes, and application specific kits such as consumable products and reagents, together make up their PCT Sample Preparation System (“*PCT SPS*”).

The PBIO pressure cycling technology takes a unique approach that has the potential for broad use in a number of established and emerging life sciences areas, which include:

- *Biological sample preparation in potentially thousands of research laboratories worldwide working in human, animal, plant, and microbial diseases and disorders – including but not limited to sample extraction, homogenization, and digestion in genomic, proteomic, lipidomic, metabolomic and small molecule study areas;*
- *Pathogen inactivation (useful in vaccine development, infectious disease research, and more);*
- *Protein purification, and in the control of chemical reactions, particularly enzymatic (useful in drug design and development);*
- *and immunodiagnosics (useful in the development and detection of biomarkers).*

## INTELLECTUAL PROPERTY

PBIO has secured their technology through fourteen issued United States patents and ten issued foreign patents covering multiple applications of pressure cycling technology in the life sciences field. They also have additional patents pending. Research indicates that Pressure Bio Science, Inc. is the ONLY Company globally to have patents in this new science sector.

**Night Food, Inc. (NGTF 0.168 )\*** is a wholly-owned subsidiary of Night food Holdings incorporated in Nevada in 2013 to manufacture and distribute healthy-choice bedtime snacks. The Company has an exclusive agreement with RFI, natural ingredient manufacturer and proprietor of *Chocamine*, a patented chocolate ingredient

Americans keep gaining more weight. People have the tendency to grab for goodies at the end of the evening as they relax to enjoy some T.V. Eating and snacking too late at night is a contributing factor to gaining weight. Seventy percent of adults, ages 18-54, eat right before bed.

Chocamine delivers the health benefits of chocolate to the body (amino acids, minerals and polyphenols) without the added sugars, caffeine or fat.

People give in to the intense hunger cravings that leads to the consumption of sugary, salty or calorie dense foods to satisfy their appetite. Most of the snacks that people typically eat create a disturbance in sleep, causing a person to wake up feeling unrested.

Night Food offers nutrient filled alternatives to high-calorie junk foods. There are flavor filled snack bars-either *Cookies and Dreams* or *Midnight Chocolate Crunch* that will help curb hunger, satisfy cravings, improve rest and give the body essential vitamins and minerals.

Consumers spend over \$50 billion/ year on night-time snacks, nearly 1 billion a week. More people desire healthy alternatives to late night consumption of the traditional fattening ice cream, chips and cookies. Sugar and caffeine in most snacks causes disruptive sleep. Each bar has only 142 calories and 5 grams of fiber for slow absorption of energy and gives a feeling of fullness and satisfaction. There is also 132 mg of calcium and zinc for replenishing the body and feeling well rested in the morning.

**Leo Motors (LEOM: \$ 0.12)\*** has patents for the electric battery industry which we will be writing about in upcoming weekly reports. They have developed a lithium battery that can operate vehicles in sub-zero climates. Their subsidiary LGM has developed battery technology supported by the Korean government to make it possible to use electric battery technology for fishing boats. They have a cartridge system which is a light-weight replacement method of swapping electric batteries.

Fishing has been harmed by the noise and oil leaks from internal combustion engines. LGM has solved that problem and besides eliminating the toxic problem, operating costs are reduced by 25%.

In addition they have a special patent for averting electric hazards and shocks. Leo developed the Internet of Things for e-boats which is networked and connected with an Android Operating System. Leo's power supply system is CAN (Controller Area Network) based, which enables mobile diagnostics between mobile devices and boats using the Leo technology.

Leo is developing a battery swap system for Kalmado in Puerto Princesa, Philippines, a world famous tourist attraction, which is focused on green energy. They will be converting 100 boats as the environment is expected to become 100% free of the toxicity from internal combustion engines. Also, Leo has developed a battery swap system for Go-Karts to be used in malls in China, Korea and Myanmar. Leo Motors has a new carbon nanotube battery power pack that functions and supplies full power in extreme low temperatures such as below 49 degrees without the need for grid electricity.

**Galaxy Gaming ( GLXZ: \$ 0.63 ) is on a nice growth pattern:** They are in a great business with very little aggressive competition. They have some of the best development and manufacturing of table games and related products for the casino industry worldwide. Casino operators are in search for new and challenging table games to obtain increased interest and more funds from players.

Located in over 500 casinos around the globe, the Company offers a large portfolio of the world's most popular side bets and proprietary table games. Additionally, the Company has a line of systems and associated equipment which provide casino operators with enhanced profitability, automation and security of table game operations.

## **Follow Our Marketed Weathered, Time Tested Trading Rules That PROTECT YOUR CAPITAL And SECURE PROFITS**

Now you can profit from investing trade alerts from our traders with over 75 combined years of successful investing experience.

- **Make Money In Up Or Down Markets** -- Our trading alerts balanced investing strategies are designed and proven to make money in up or down markets.
- **Done For You** - All the stock options picking, research and trading analysis is done for subscribers. This is not a 'class' or a 'training course'... this is us doing ALL the work... from research to sending you a text on what to trade, along with recommended amounts...
- **SAFETY** - We strictly follow our **Tested, Market Weathered Trading Rules** that are proven time and time again to protect our (and now your) investment capital from losses while effectively allowing us to **Keep The Profits We Make**.

So even though we trade options to get the profits you see above -- We can do it with minimal risk and Maximum Profit Potential.

### **You Don't Need To Learn Any Trading Skills Or Do Any Time Consuming Analysis and Tracking**

**+++ We DO IT ALL FOR YOU! +++**

We tell you where, when and how much to trade and you get to sit back and enjoy the rewards!

The specific buy and sell trading alerts are sent directly to you by e-mail and text message. So you can get in on and cash out on our winning trades fast and at the right time.

Get Started with Any Amount - Follow our recommended trading guidelines for a \$10,000 portfolio or invest more or invest less -- Whatever you are comfortable with. Your investment is protected because **Time Tested Trading Rules PROTECT YOUR CAPITAL And KEEP YOUR PROFITS**.

### **Rule 17B Attestations and Disclaimers**

Princeton Research, Inc. has approximately 2,581,578 shares of AIVN both free and restricted and represents them for Investor relations. Princeton also has about 40,000 shares of TXGE. Princeton is

paid \$ 1,500 per month from RMS Medical Products. Princeton has bought 81,100 shares of RMS Medical Products. Princeton was paid \$ 2,500 to write a report on Xinergy. Princeton has signed a contract with CBLI to be paid \$ 2500 for July and August for investor relations. Princeton has been engaged by Target Energy. No contract is currently in place. Princeton was paid about 500,000 restricted shares of Leo Motors.

When there is no movement in penny stocks, even though there is none or very small losses, we will liquidate ( sold AIVN on stop ) even though we like the company, if money is needed for better opportunities.

We now believe REPR represents upside opportunity. The Target ADR trades at about \$ 4.50 in U.S. vs 0.05 in Australia. Princeton owns 400,000 Australia shares and about 900 U.S. ADR's.

Pursuant to the provisions of Rule 206 (4) of the Investment Advisers Act of 1940, readers should recognize that not all recommendations made in the future will be profitable or will equal the performance of any recommendations referred to in this e-mail issue. Princeton may buy or sell its free-trading shares in companies it represents at any time.
